SHORT-TERM EXHIBITIONS:

Ladislav Novák: Discoverer of New Methods

1. 10. - 5. 12. 2010

Amongst L. Novák's greatest discoveries is the technique Alchemage, in which the author used chemicals to reshape a variety of reproductions. He also developed the technique Froissage, which was also an important component of his development. Froissage is a method of collage in which the lines made by crumpling up a piece of paper are used to create a drawing. By creating and using these techniques, L. Novák greatly contributed to the development of the Czech experimental art scene. Visitors to the exhibition will see works by this artist, which have never been publicized.

Days of Italian Culture in Museum Kampa

7. – 9. 9. 2010

The event will take place in the picturesque historical centre of Prague in the Lesser Town, Charles Bridge and on Kampa Island, which will be putting on the mask of Italian Venice.

Luminarium: a concert with an artistic projection

4. 10. 2010 from 7.30 p.m.

p. **Wajsar** composition for video and orchestra (premier)

k. **Mařatka** luminarium

l. **Sumera** chamber music

“We searched for something interesting for the concert to be held in Museum Kampa, which would connect **art** with **music**. We wanted both elements to emerge simultaneously, so that the art component has the same importance as the music within this concept, which is jointly created by the composer and artist. For this experiment we chose the composer Patr Wajsar, who once again chose from our list of artists Prokop Bartoníček.”

Peter Vrábel, artistic director of the BERG and conductor.
